Family & Member Management

To create a family click the 'Me' icon and then "Family Management"

Click on the "Add family" and enter the family name, this can be anything you like, a family is set up so members can be added to control the devices within that family.

At this point you can also set your location, this is useful for heating products as the weather data can be used to control your heating, move the icon manually to change the location if needed and click "Confirm" to confirm the location.

You can also select from a list of rooms with smart devices in this screen, to add a room click 'Add Room' and enter room name.

Once complete click 'Done' in the top right corner of your screen.

Adding Members to a Family

*NOTE: Any member added to a family must also be registered on the Smart Life App.

If you require other people in your home to have access to the smart products they must be added as a member to the family already created, to do this:

Click the 'Me' icon and then "Family Management"

Select the family you would like to add the member too and click 'Add Member'

Add the name of the family member and the email address or phone number they used to register with the Smart Life App

Once complete the member will be sent a request to join your family and you will see the family member under the family members section along with 'Waiting to join...'

Once the family member has accepted the invitation they will be shown in the 'Home Members' section.

To Accept an Invitation

Invitations will appear in the Message Centre, click 'Family' on the top of the screen to see the invitation

To accept or decline the invitation click the drop down in the top right corner of the screen and either accept or decline.

Once accepted the family name will appear in the drop down, click on the family to control all devices added in that family.
